INTRODUCTION

ABOUT ME

My name is Harven Sanjaya, and I am an enthusiastic student in the field of information technology, with a strong desire to engage in the professional world in a meaningful capacity. Currently, I am pursuing a degree in Computer Science, with a specialization in software development Throughout my academic journey.

I've delved deep into various programming languages, algorithms, and software engineering principles, honing my analytical and problem solving skills along the way. I have been gaining experience in Web Development Since High School. Apart form being a student, i also takes relevant projects and work as freelancer.

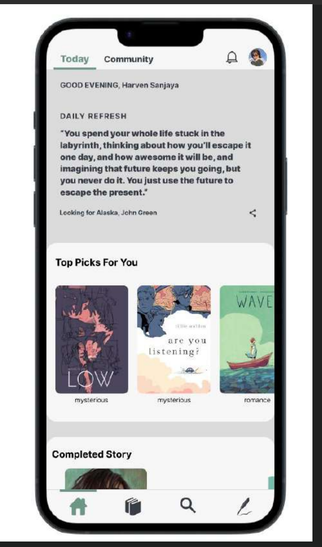
PRODUCT INVENTORY

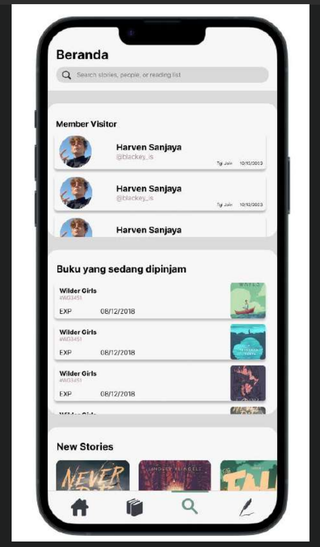
UI / UX Design

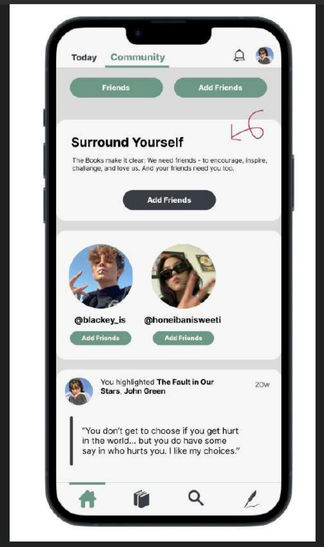
SOFTWARE: FIGMA

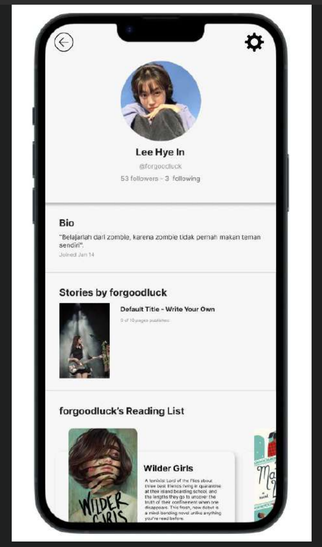
Link Project

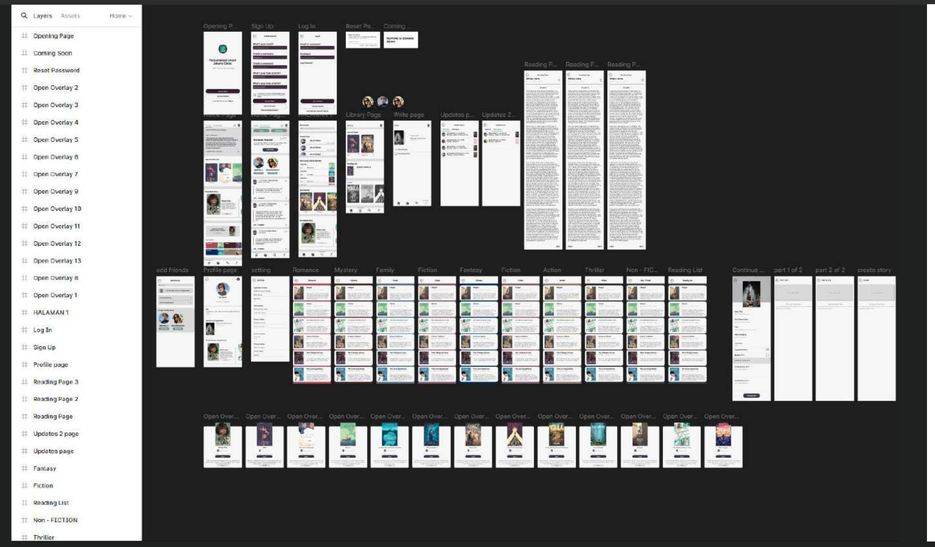
This project involves the UI/UX design of an inventory management application created using Figma. It includes a basic user interface for tracking the inflow and outflow of goods, as well as an admin interface for managing and adjusting inventory flexibly.

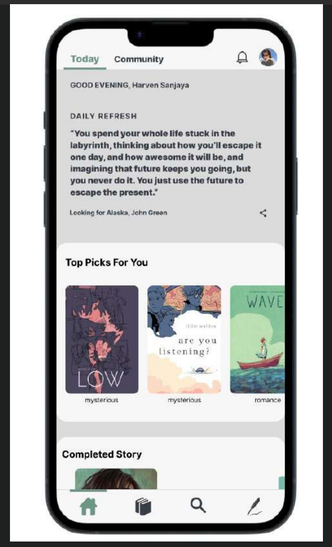












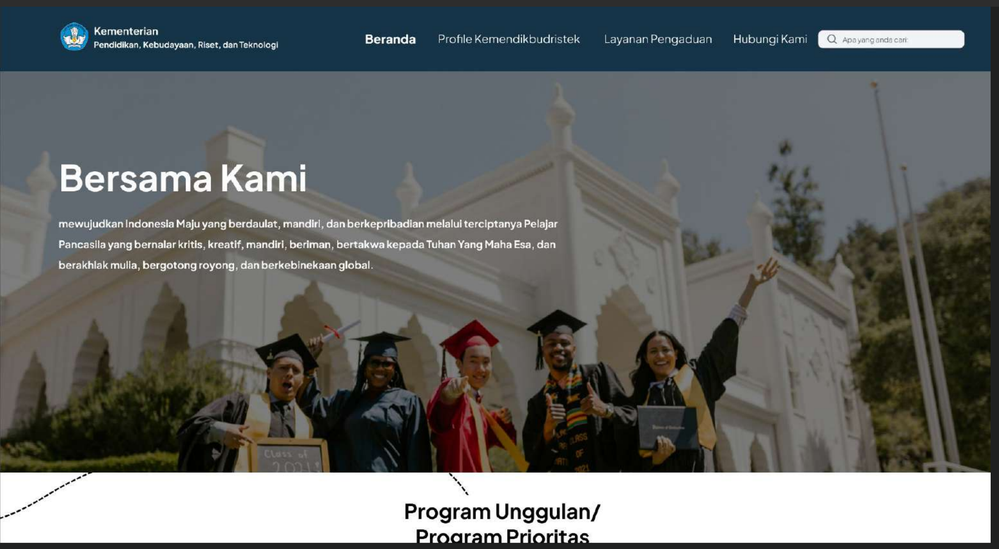
BOOK LOVER SOCIAL MEDIA

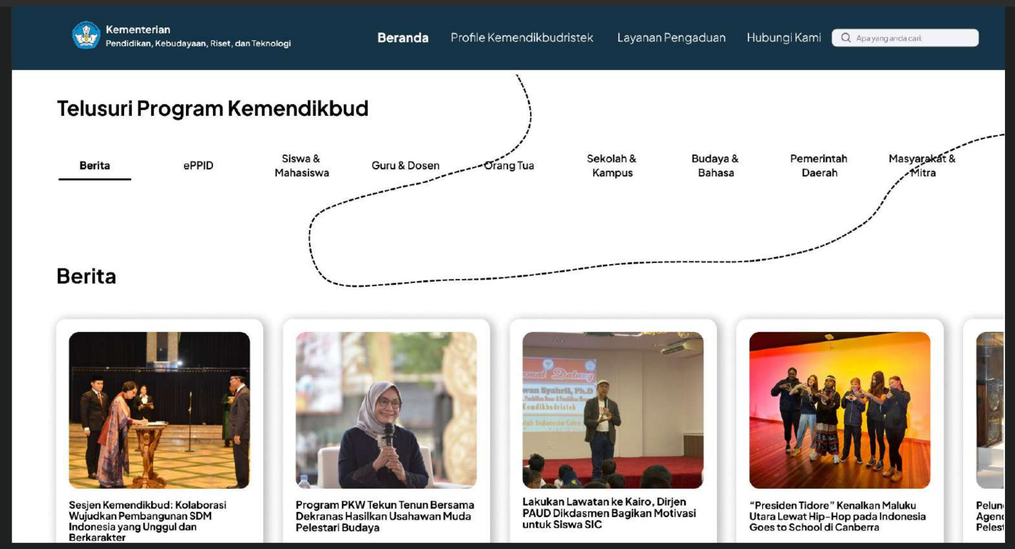
UI / UX Design

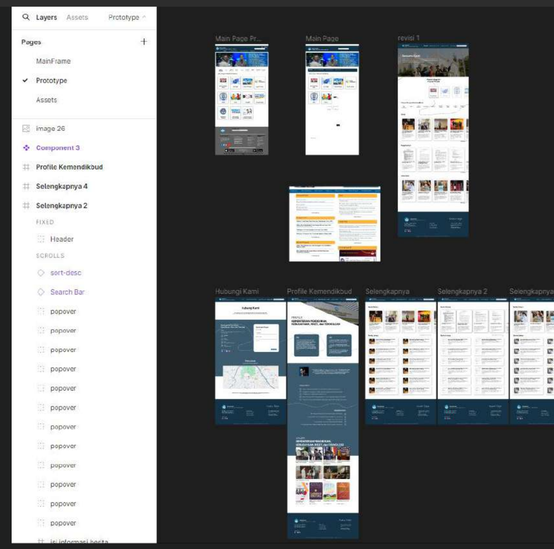
SOFTWARE: FIGMA

Link Project

This project involves the UI/UX design of a social media application for book lovers, inspired by Wattpad, and created using Figma. Each user page is designed to be as engaging as possible, enabling users to perform basic functions such as posting quotes from books and creating their own stories.







MODIFICATION GOVERNMENT WEBSITE

UI / UX Design

SOFTWARE: FIGMA

Link Project

This project involves the UI/UX design of a modified version of the Indonesian Ministry of Education and Culture (Kemendikbud) website using Figma. The original site primarily served as a navigation hub for various services offered by the ministry. The modification expanded the website's functionality by adding features such as updated news and ongoing events, while also making the design more visually appealing.
